

ALC Maths Mastery Course for Secondary level focuses on getting our students in mastering the development of numeracy, reasoning, thinking skills, and problem solving skills through the learning and application of mathematics.

1. To acquire the necessary mathematical concepts and skills for everyday life, and for continuous learning in mathematics and related disciplines.
2. To develop the mathematical thinking and problem solving skills and apply these skills to formulate and solve problems.
3. Recognize and use connections among mathematical ideas, and between mathematics and other disciplines.
4. To develop positive attitudes towards mathematics.
5. To produce imaginative and creative work arising from mathematical ideas.
6. To develop the abilities to reason logically, to communicate mathematically, and to learn cooperatively and independently.

Why Maths Mastery @ ALC?

1. Personalised teaching – our class size is small (an average of 16 students) and each student matters to us.
2. Classes taught by qualified and experienced Maths experts.
3. Our classes are taught in English which will help students to improve the use of English in Mathematics.
4. Our Maths Experts believe in fun learning and we are passionate about it.
5. Regular feedback on students' progress and dialogues session with parents.
6. Learning resources are carefully chosen and they focus on getting students to be involved in interactive mathematical activities that encourage exploration, discovery and active thinking.
